# Reverse the Effects of Aging

- ◆ Increase Your Energy
- ◆ Reduce Fat
- ◆ Increase Sexual Potency
- ◆ Gain Lean Muscle
- ◆ Sharpen Memory
- ◆ Improve Sleep Quality
- ◆ Wrinkle Reduction

## 2 Free Bottles Offer

You get 2 Free Bottle by ordering today!

## HGH Energizer can help you feel young again!

Recent studies have shown the direct impact HGH has on multiple body functions. By the time you reach 60, your natural production of HGH is most likely to be half of what it was when you were 20. This means that you will have less energy, more body fat, heal slower and have a weaker immune system.

How can HGH Energizer help me?

By supplying your body with increased release of HGH, HGH Energizer can help you fight the effects of aging and make you look young again.

## This is how it works...

HGH is produced by the anterior pituitary gland and plays a role in the immune system function, tissue repair, cell replacement, and bone strength. Although HGH levels decrease as you get older, you can supplement HGH naturally into your diet. So where exactly can you get HGH:

- ◆ Exercise- Exercising regularly will slowly begin to increase natural production of HGH.
- ◆ Eat Certain Foods- Certain amino acids, arginine, lysine, and ornithine can promote the body's natural release of growth hormone.
- ◆ HGH Energizer Supplement- All the benefits of HGH without any side effects. HGH Energizer is a new and powerful HGH release supplement, and it is all natural. You get all the benefits of an HGH release product without any possible side effects.

## Very High Success Rate

Many of our customers are happy with our HGH Energizer product and look forward to a more energetic and healthier future.

## 100% Money Back Guarantee

We are so confident with our HGH Energizer Product that if you're not satisfied with our amazing product we will refund you 100% of your money.

## About Us

**HGH Energizer** is a professional company that provides HGH information and HGH release products for Human Growth Hormones. HGH Energizer provides natural supplements that can slow or reverse the biological and physical effects of aging. The HGH Energizer product can help you release more HGH in your body, which should make you lower your biological age in comparison to your chronological age.

All of our products are tested by biochemists and made sure to be safe and effective for all of our customers in the United States and internationally.

We specialize in herbal products that help individuals in different areas of their lives. We highly recommend that consumers purchase our products for their safety and protection because all of our products are made in FDA approved Laboratories.

### How it Works

#### What is HGH?

Human growth hormone is known as the Master Hormone or the "Hormone of Youth". It controls the release of many other hormones in the body and is made by the pituitary gland in the center of the brain. During childhood, HGH directs the growth of the body. In adults, HGH begins to decline steeply with age. This decline is associated with many of the effects of aging. Hundreds of studies have been done on the use of HGH in adults. It has been found to raise energy levels, enhance lean muscle, decrease body fat, strengthen the heart, improve cholesterol, fortify bones, smooth out wrinkles, sharpen memory, improve sexual function, regenerate damaged tissues, boost the immune system, and improve sleep.

#### HGH Energizer

contains a specific combination of amino acids and other nutrients that naturally stimulate the release of your body's own HGH. It is called a "secretagogue". It causes the pituitary gland in the brain to secrete or release more of its own natural HGH. Unlike sprays, this product is in a pill format and it goes directly into the bloodstream for faster results. It's delivery system provides ten times greater absorption than other methods.

#### Who Should Use HGH?

Any adult over 30 who is experiencing the effects of aging and who wants to look and feel younger by reversing the aging process of their body. It is not recommended for persons with health conditions, people taking prescription medicines, for people who currently have or have had cancer in the past, or for pregnant or lactating women. Raising one's HGH levels has been proven to reverse the changes in body fat, muscle mass, and bone density that take place during the years of aging.

#### Research and Statistics

The original scientific studies done on human growth hormone were done with injections of the synthetic drug form of HGH. More recently, it has been discovered that natural nutrients and amino acids, which are provided in an effective delivery system can also successfully raise HGH levels in the body.

#### Studies Done on Vitamin Boost's LifeFactor, Nature's HGH

April 2002 -- The Journal of Longevity  
 "Natural HGH Liposome Activator Proven Effective"

The Journal of Longevity recently published the first placebo-controlled study of a natural HGH activator. A liposome is a fatty-like substance such as lecithin -- the same substance contained in most of the body's cell membranes. The liposome jacket assists the active ingredients past the cell wall and into their target cells.

#### November 2001 - The Millenium Health Centers

"Secretagogue Evaluation Study"

A secretagogue is a substance that causes the body to secrete or release more of it's own HGH. This study found a significant increase in HGH after only one month of the secretagogue use. HGH repairs and rejuvenates almost every organ in the body. This Phase I study was done with 16 participants who were tracked for one month. They ranged from 37 to 59 years of age. At the end of 30 days, there was a 25% increase in HGH levels on the average.

#### Studies Done with Injections of the Drug-Form of HGH

According to the V.A. Medical Center and Department of Medicine, Stanford University Medical Center:  
 "It is possible that chronic physiologic HGH ...replacement therapy might reverse or prevent some of these "inevitable" sequelae (results) of aging". (Study of HGH therapy in the elderly - March 1992).

The Kobe University School of Medicine, Kobe, Japan, conducted a study entitled "Effect of ...human growth hormone in elderly osteoporotic women". The researchers found that "HGH attenuates (reduces) the decrease in muscle strength and bone mass as well as the gain of abdominal fat with aging in elderly women. The present data provides useful information about the application of HGH treatment in elderly women."

#### The New England Journal of Medicine

published a study in July 1990 entitled: "Effects of Human Growth Hormone in Men Over 60 Years Old". The researchers concluded that the administration of human growth hormone for six months, was accompanied by an 8.8 percent increase in lean body mass, a 14.4 percent decrease in body fat, and a 1.6 percent increase in bone density. The HGH therapy reversed the changes that would normally take place during 10 to 20 years of aging.

## Ingredients

All of our ingredients are 100% Natural. None of our products contain Ephedra.

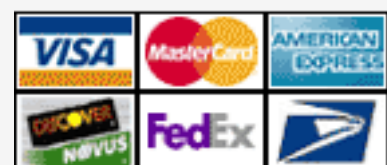

## Supplement Facts

Serving Size: 2 Caplets Servings Per Container: 30

Amount Per Serving		% DV/RDI
<b>Vitamin B6</b> (Pyridoxine as Pyridoxine Hydrochloride)	20 mg	1,000
<b>Tribulus</b> (Tribulus terrestris) (fruit)	250 mg	*
<b>L-Arginine Hydrochloride</b>	150 mg	*
<b>L-Leucine</b>	150 mg	*
<b>L-Glutamine</b>	140 mg	*
<b>L-Lysine Hydrochloride</b>	90 mg	*
<b>Gamma-Amino Butyric Acid</b>	75 mg	*
<b>L-Isoleucine</b>	60 mg	*
<b>L-Valine</b>	55 mg	*
<b>Colostrum</b> (standardized to contain 30% immunoglobins)	25 mg	*
<b>L-Ornithine Hydrochloride</b>	25 mg	*
<b>L-Glycine</b>	10 mg	*

\*Daily Value and/or Recommended Daily Intake not established.

**Other Ingredients May Contain:** Calcium Carbonate, Dibasic Calcium Phosphate, Tribasic Calcium Phosphate, Microcrystalline Cellulose, Fructose, Dextrose, Sucrose, Maltodextrin, Croscarmellose Sodium, Stearic Acid, Magnesium Stearate, Silicon Dioxide, Sodium Starch Glycolate, Modified Cellulose, Citric Acid, Xylitol, Sucralose, Natural & Artificial Flavors, Acacia Gum, Shellac, Sodium Lauryl Sulfate, Sorbitol, Gelatin, Hydroxypropyl Methylcellulose, Hydroxypropyl Cellulose, Hydroxypropyl Ethylcellulose, Pharmaceutical Glaze, Food Glaze, Starch, Talc, Titanium Dioxide, Vegetable Oil, FD&C Red 40, FD&C Red Lake, FD&C Blue 40, FD&C Blue Lake, FD&C Yellow 40, FD&C Yellow Lake, Water.

If your unable to find answers to your inquiries after reviewing these frequently asked questions please feel free to contact Us. [Click Here](#)

#### 1. What is Human Growth Hormone (HGH)? [Top](#)

Human Growth Hormone, or HGH, is produced by the pituitary gland in large amounts when we are young, but secretion falls off sharply as we age. Human Growth Hormone promotes tissue repair, cell regeneration in the bones, muscles and vital organs, and supports the immune system in combating infection and disease. HGH achieves this by improving movement of amino acids (the building blocks of cells and muscles) across cell membranes. As the body's cells die off, hGH ensures that replacement cells are healthy and readily available. As we age, our HGH levels decline causing our cell replacement levels to reduce. Doctors Natural HGH supplementation supports the body's ability to self-repair and delay the aging process.

#### 2. How does HGH Energizer work? [Top](#)

HGH Energizer is a proprietary formulation that stimulates the pituitary gland to increase release of Human Growth Hormone into the bloodstream. Our HGH Energizer includes releasing agents, which are naturally occurring growth hormone peptide molecules. These peptides function as messengers to stimulate HGH and naturally direct the pituitary to achieve maximum GH support.

#### 3. What's unique about HGH Energizer? [Top](#)

HGH Energizer offers sustained release for guaranteed absorption and delivery. Our HGH Energizer is absorbed directly into the bloodstream.

#### 4. How long does it take for the HGH Energizer to work? [Top](#)

Some people realize immediate, dramatic results, while others experience more subtle effects. Generally, positive changes take place between one to six months. Please note that if your HGH levels have been low for years, then your receptor sites may be blocked. So it could take some time for your body to respond in a positive manner. With proper diet and exercise, results can be faster and more pronounced.

#### 5. How can HGH Energizer improve my body Month-By-Month? [Top](#)

First Month: It should improve stamina, better and sounder sleep, vivid dreams, feeling more refreshed upon awakening, increased energy, more optimistic attitude and a better sense of humor.

Second Month: It should improve muscle tone, improved nail growth, increased strength, weight loss, enhanced sexual function, improved skin tone, better digestion, and better eyesight, especially night vision.

Third Month: It should give you a muscle size increase, hair growth, increased sexual desire, less pain, improvement in mental processes, faster wound recovery and less muscle soreness, reduction in PMS symptoms, greater body flexibility, and alleviation of some menopausal symptoms

Fourth Month: It should give you more consistent improvements, as listed above.

Fifth Month: It should give you impressive weight loss / inch reduction, thickening of skin and greater elasticity, thickening of hair with a shiny, health appearance, improvement in skin texture/appearance, and reduction of wrinkles.

Sixth Month: It should make your cellulite greatly diminish, eyesight greatly improves, stronger resistance to colds, flu and other illnesses, old wounds are healing or have healed, grayed hair begins to return to natural color, blood pressure normalizes, body is much more contoured, emotional stability is improved, some pain and soreness disappear, exercise tolerance is increased, LDL and triglycerides are reduced, heart rate improves, and immune system improves.

#### 6. What age is appropriate to start taking HGH? [Top](#)

HGH should not be used by anyone under 21 years old. As intelligent individuals, each one of us must decide this for him or herself. But if you're over 30 and experiencing problems that didn't exist 10 years ago, maybe these problems are associated with decreased levels of human growth hormone in your blood. By age 30 that level is about one third of what it used to be at age 18. For most people the age of 18 was a time when we took our health for granted. But by the time we reach 30 we may be overweight, lacking energy, etc. With decreasing levels of HGH as we age, is it a wonder things seem to get worse with time? The following table displays the normal level of HGH in the body measured in nanograms/milliliter of blood. As you can see, there is a dramatic difference between that of an 18 year old and anyone older than 30 (1000 vs.325). It's no wonder we start going downhill in our 30's.

Age	Level	After age 30 it's never too soon to start taking human growth hormone. Both men and women report gains in energy levels, reductions in body fat, and an overall sense of well being. Younger adults, especially bodybuilders and athletes of all kinds can benefit from taking this product.
18	1000	
20	775	
25	500	
30	375	
35	325	
40	300	
85	225	

#### 7. Why is the HGH Pills or Spray better than Injectable HGH? [Top](#)

With injectable human growth hormone (HGH) there is much skepticism about absorption, best time to inject and the amount to inject.

With the cost of injectable HGH at about \$800.00 to \$1200.00 per month and HGH Energizer pills or spray at \$59.00 per month it takes the guess work out of the equation. Injectable HGH is active approximately 30 minutes in your system before it is dissipated or lost. Because HGH dosages are not an exact science, clinical trials have not yet determined the quantity (IU's) needed, injection times, durations for optimum results. Which simply put means there is a lot of wasted HGH happening besides the side effects that come with incorrect dosages.

There is also the chance that while injecting HGH that your pituitary gland could be permanently shut down. This is why supplementing HGH Energizer in a way that mimics the body's own cycle of secretion is far more efficient because you take small dosages giving you 100% absorption.

#### 8. Is HGH Energizer therapy safe? [Top](#)

HGH Energizer is not a steroid; it is a protein. This protein is naturally produced by the pituitary gland, but we all become deficient in HGH as we age. Our HGH Energizer has been developed to provide a physiological dose in line with the body's own natural production and rhythm. This means that HGH Energizer should be delivered in modest doses. When taken this way, HGH Energizer has been proven to be totally safe, with a record of zero side effects.

#### 9. Who should not take this product? [Top](#)

HGH Energizer is not for use by people under 21 years old, pregnant woman, those who have or have had cancer. Those with any other medical condition, or who are taking prescription medicines should consult your doctor before taking this product.

#### 10. How is this product packaged for mailing to me? [Top](#)

HGH Energizer is sent discreetly via USPS in the United States and DHL or Fedex for international orders.

#### 11. How good is your money back guarantee? [Top](#)

The best in the business. If for any reason you are not 100% satisfied with our product we will refund you 100% of your Money. *You have nothing to lose!*

#### 12. Are their any alternative ordering methods besides using a credit card? [Top](#)

You can order our products with the 4 major Credit Cards (Visa, Master Card, American Express, Discover Card). You can also pay us by sending a money order or a cashiers check. [Click Here to Contact Us](#)
